---

SUMMARY

Solution focused individual with over 8 months of training and experience in software engineering. I have built frontend interfaces and backend APIs for a timeline generator website, a book club social media site, a tech blog site, and many more projects. I am looking for a dynamic and diverse team to build meaningful products.

PROJECTS

Memory Lane - https://the-memory-lane.herokuapp.com/
- A timeline generator web application, created with React.js, MongoDB, Node.js and Express.js
- User authentication is verified with JSON web tokens.

Bookend - https://glacial-plateau-74113.herokuapp.com/
- A book club social media site, where users can create clubs to review and discuss books
- The site uses a MySQL database as well as Handlebars.js as a frontend framework

Pethub - https://cmwschroeder.github.io/pethub/
- A pet adoption site with informational pages as well.
- The site fetches data from external APIs with a user friendly, mobile-first design
